### **DETAILED ACTION**

#### **Election /Restriction**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-28, drawn to a process for isolating phytosterols from pulping soap, classified in class 424, subclass 725.
- II. Claims 29-40, drawn to a process for isolating a mixture of salts of fatty acids and salts of resinic acids from pulping soap, classified in class 424, subclass 725.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). Invention I is a process of isolating phytosterols from pulping soap and invention II relates to a process of isolating salts of fatty acids and salts of resinic acids from pulping soap. These are distinct inventions.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
